# ABOUT

PT. Trialogix Integra Perkasa is a system integrator company in the industrial process sector. Through quality services and always prioritizing quality control, we always provide maximum results and quality to meet customer needs. To implement this, we have excellent work procedures and are supported by qualified and experienced personnel.

# VISION

To be a professional service provider company for consulting, service, design, modify and supply of industrial sector materials covering the fields of Automaton, Control, Instrument and Electrical that are trusted and of high quality.

# BUSINESS

The company's business focuses on providing consulting, service, design, modify and supply of industrial materials to the industrial sector covering the fields of Automation, Control, Instrument, and Electrical. We apply EPIC (Engineering, Procurement, Installation & Commissioning) working principles to design from start to finish in every job to provide the best for customers both in terms of work safety aspects, work schedule effectiveness to industrial system performance and quality.

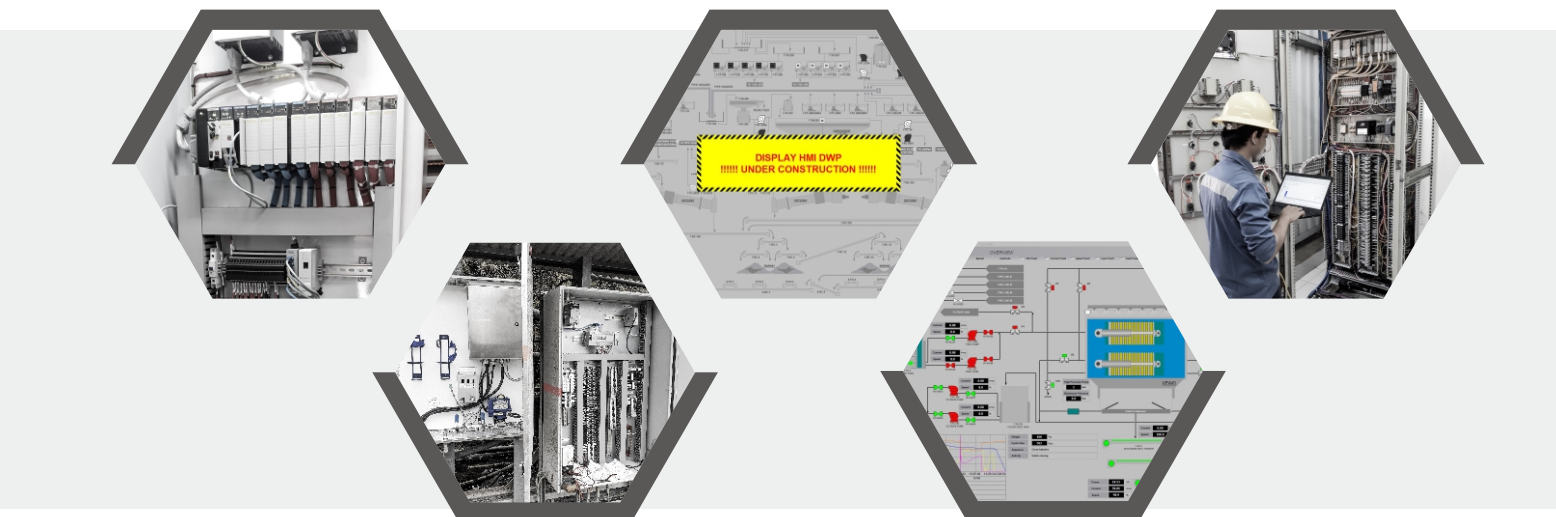

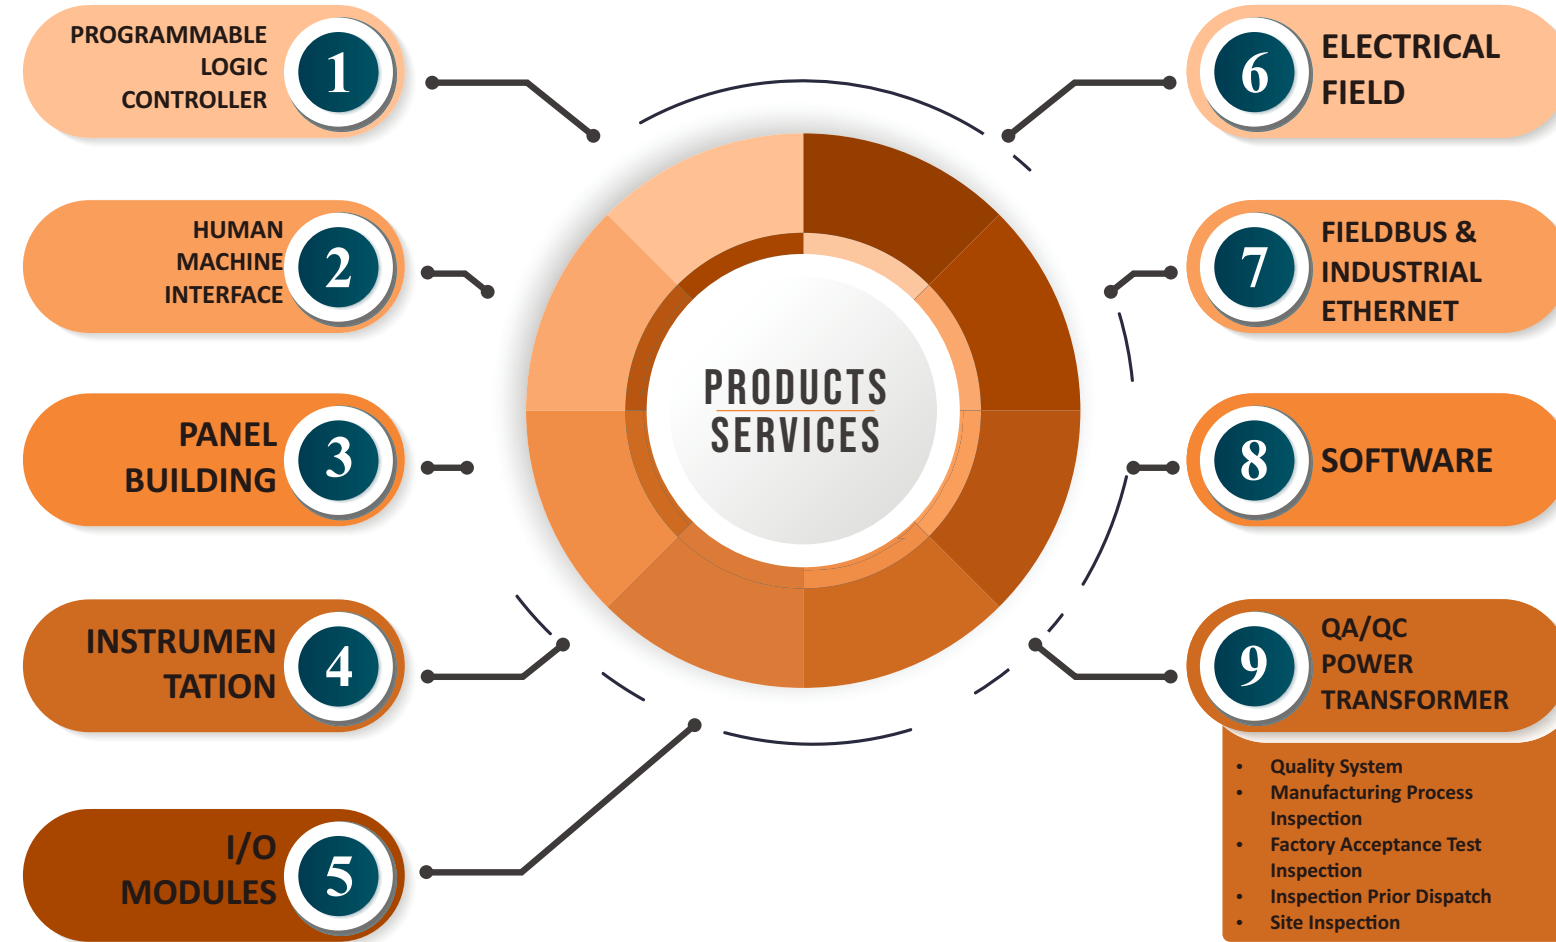

# COMPANY OVERVIEW

# MISSION

Able to provide solutions to problems as well as maximum and quality results in meeting customer needs by prioritizing aspects of work safety, work effectiveness and performance of industrial process systems
